

NETFLIX CONTENT INSIGHTS

Final Report — Catalog Trends & Content Strategy

1. Executive Summary

This report analyzes Netflix's content catalog of approximately **9K titles** released between **1925 and 2021**. The dataset includes Movies and TV Shows along with details such as genre, maturity rating, country of origin, and year added. Movies account for **70.77%** of the catalog, while **TV Shows represent 29.23%**, with content sourced from **87 countries**.

The analysis identifies trends across content type, genre, ratings, and countries. It shows that Netflix's library is mainly focused on mature audiences, with a few genres and countries contributing most of the content. The catalog also grew rapidly before **2018**, reflecting Netflix's global expansion and content strategy.

9K	6K	3K	87
Total Titles	Total Movies	Total TV Shows	Total Countries

2. Dashboard Overview

To The findings are presented through an interactive dashboard that combines key catalog KPIs with filters for release year, country, content type, and maturity rating. It also includes visualizations of content distribution by rating, genre, country, age group, release year, and the Movie vs. TV Show split, enabling users to quickly explore trends and gain meaningful insights into Netflix's content catalog.

3. Most Common Content Ratings

The maturity rating distribution shows that Netflix's catalog is heavily focused on mature audiences. **TV-MA** is the most common rating with approximately **3.21K titles**, followed by **TV-14 (2.16K)**. **TV-PG (0.86K)**, **R (0.80K)**, and **PG-13 (0.49K)** appear less frequently, indicating that most content is designed for teenagers and adults rather than young children.

This trend highlights Netflix's strong emphasis on mature entertainment, including dramas, thrillers, and original series. It also emphasizes the importance of parental controls while suggesting an opportunity to expand family-friendly content to better serve younger audiences and households.

Rating	Titles
TV-MA	3.21K
TV-14	2.16K
TV-PG	0.86K
R	0.80K
PG-13	0.49K

4. Movies vs TV Shows

Netflix's catalog is dominated by **Movies**, which account for **5.32K titles (70.77%)**, while **TV Shows** make up **2.20K titles (29.23%)**. This distribution shows that Movies remain the primary content type, although the platform has steadily expanded its TV Show library over time.

This balance reflects Netflix's content strategy, where Movies provide a broad and diverse catalog, while TV Shows encourage higher viewer engagement and long-term retention. Monitoring this ratio over time can help identify shifts in Netflix's content investment and programming priorities.

5. Titles Released Per Year & Top Countries

The number of titles released increased steadily from **2012**, reaching a peak of around **1K titles per year** in **2018**, before declining slightly in **2020–2021**. This growth reflects Netflix's rapid expansion and increased investment in content production and acquisition during its peak growth years.

Although the catalog includes content from **87 countries**, production is heavily concentrated. The **United States** contributes the largest share, followed by **India** and the **United Kingdom**, while the remaining countries contribute significantly fewer titles. This highlights Netflix's global reach while showing that its content library is still driven by a few major production markets.

6. Top Genres & Content by Age Group

Dramas are the most common genre in Netflix's catalog, with around **2K titles**, followed by **Comedies, Action & Adventure, Documentaries**, and **International TV Shows**. This distribution shows that Netflix focuses on popular mainstream genres while maintaining a diverse selection of content for different audience interests.

By target age group, **Adults** represent the largest segment with around **3K titles**, followed by **Teens (2K)** and **Children (1K)**. This confirms that Netflix's library is primarily designed for adult and teenage viewers, with a comparatively smaller share of content dedicated to younger audiences.

Age Group	Titles
Adults	3K
Teens	2K
Children	1K
Kids	~0K (small)
Unknown	~0K (small)

7. Key Insights

The analysis highlights the following key insights from Netflix's content catalog:

- **Netflix's catalog contains approximately 9K titles** released between **1925 and 2021**, offering a broad view of the platform's content evolution.
- **Movies dominate the library (70.77%)**, while **TV Shows account for 29.23%**, indicating a strong focus on feature-length content.
- **TV-MA** is the most common maturity rating, followed by **TV-14**, showing that the catalog primarily targets **adult and teenage audiences**.
- **Content production increased rapidly after 2012**, reaching its highest level around **2018** before slowing slightly in later years.
- The platform features content from **87 countries**, demonstrating Netflix's extensive global presence.
- The **United States, India, and the United Kingdom** contribute the largest share of titles, making them the platform's key content-producing markets.
- **Dramas** are the most popular genre, followed by **Comedies, Action & Adventure, Documentaries, and International TV Shows**, reflecting diverse viewer preferences.
- The catalog is heavily focused on **adult and teen audiences**, while **children's content** represents a comparatively smaller portion of the library.

8. Recommendations

Based on the findings of this analysis, the following recommendations can help strengthen Netflix's content strategy and improve audience engagement:

- **Increase investment in original TV Shows** to improve viewer engagement and long-term subscriber retention.
- **Maintain a balanced mix of Movies and TV Shows** to ensure both catalog variety and continuous audience interest.
- **Expand family-friendly and children's content** to better serve younger audiences and households.
- **Invest in content from more countries** to strengthen regional representation and support global market growth.
- **Continue focusing on high-performing genres** such as Dramas, Comedies, Action & Adventure, and Documentaries.
- **Regularly monitor audience age-group distribution** to maintain a balanced catalog for different viewer segments.
- **Track annual content release trends** to support future planning and optimize content acquisition strategies.
- **Leverage data-driven insights** from viewer preferences and catalog performance to guide future content and licensing decisions.
